MATH MATRIX FOR MCC DEGREES

The following table will help you determine the credit math needed for your **degree** program. This table indicates **only** the first math course needed for your major's graduation requirements. Please note that **more than one semester of math may be needed** for your major. Majors needing only one semester of math for graduation are noted with **(1)** while majors needing more than one math for graduation are noted with **(2).**

Some majors allow more than one possible math for graduation. These majors are highlighted with an asterisk and the other possibilities have "OR" within the different math cells.

If a major requires BUS 115 or MAT 101 or MAT 107, please note that either MAT 123 or MAT 129 is permitted with the proper SAT or Placement Test score or completed prerequisite. Please make an appointment with a transfer counselor in the Department of Counseling and Career Services (Edison Hall 100) for the proper math course for your transfer wishes.

	BUS 115	MAT 101	MAT 107	MAT 113	MAT 116	MAT 123	MAT 129	MAT 131
